The coverage range should be used only as a general guideline since it varies according to the size of the room and the furniture inside the room.

8-5-1 FRESH AIR INTAKE AND BRANCH DUCT

1. Branch duct hole and fresh air intake hole (Fig. 1)

At the time of installation, use the duct holes (cut out) located at the positions shown in Fig.1, as and when required.

- A fresh air intake hole for the optional multi function casement can also be made.

Note:

The figure marked with * in the drawing represent the dimensions of the main unit excluding those of the optional multi function casement.

When installing the optional multi function casement, add 135 mm to the dimensions marked on the figure.

When installing the branch ducts, be sure to insulate adequately.

Otherwise condensation and dripping may occur.

Unit : mm

Fig. 1

2. Fresh air intake (Installation at site)

- By mounting the optional multi-function casement to the indoor unit main body, and mounting the duct and duct flange (option) onto it further, fresh exterior air intake can be accomplished.
(The mounting of the multi-function casement increases the height of the ceiling plenum by 135 mm.)

3. Fresh air intake volume & static pressure characteristics

4. Change of outlet numbers

[The optional air outlet is necessary.]

To change the air outlet number to 3-, or 2-way outlet, the outlet number should be closed with the operational air outlet shutter.

(When the air outlets are closed, close the vane by removing the vane connector.)

5. Branch duct and change of outlet numbers

※ Branch duct should be connected to one of the branch duct holes on the main unit.

※ Close the outlet on the side of branch duct and air flows in 3 directions.

※ The outlet on the side of branch duct and one of the other outlets are closed. Air flows in 2 directions.

- Use 1 of the 2 duct holes on the indoor unit.
- Air flow rate of PLA-RP35~60BA can be calculated from the airflow rate based on the characteristic of the duct for PLA-RP71BA.
- Use the optional air outlet shutter plate (PAC-SH51SP-E) for 3-way and 2-way air flow.
